PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years and 20+ shipped projects across web and mobile (React, Next.js, Node.js, React Native) for clients in Bangladesh, Australia and the UAE. Open to remote and hybrid roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React, Next.js, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, shadcn/ui

Mobile: React Native, Expo, Expo Router, EAS Build, Push Notifications (FCM, APNs)

Backend: Node.js, NestJS, Express, REST APIs, Prisma, Drizzle, Sequelize, Firebase, Supabase

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Docker, Vercel, Stripe, Vitest, Playwright, Postman, Agile

WORK EXPERIENCE

Software Engineer, Webozza (formerly Stackifya)

Dhaka, Bangladesh | Sep 2025 – Sep 2026 (1 yr 1 mo)

- Engineered core features of Biome Aura, a creator-verification social app built on React Native, Expo and Firebase: identity verification, content submission, community voting, reporting and guided onboarding.
- Architected an end-to-end push notification system covering 20+ notification types, with Android FCM and iOS APNs delivery, in-app history and deep-link navigation.
- Built a 13-page Next.js admin dashboard for content review, voting, moderation and audit logs, with Gmail OAuth email notifications.
- Implemented 3 public share routes with Open Graph previews, plus iOS universal links and Android app links that open content directly in the app.
- Delivered 10+ customer flows for the Farmer to Fridge React Native app (Australia): search, cart, checkout, order tracking, support tickets and premium membership.
- Published UI DevTools, a Chrome extension for UI debugging and design audits, to the Chrome Web Store; automated PDF and Word document generation from dynamic forms.

Software Engineer L1, Tivoize

Remote | Apr 2024 – Apr 2025 (1 yr 1 mo)

- Developed core user flows in Next.js and Supabase for Fruto, a B2B fruit marketplace: role-based onboarding, listing creation and real-time delivery preparation.
- Built a Next.js admin dashboard for user and content management, backed by REST APIs in Express.js and MongoDB.
- Extended an Electron.js ERP across 2 modules (Admin and Purchase) with offline sync, and optimized its React frontend.

Junior Software Engineer, Syscon Solution Ltd

Dhaka, Bangladesh | Feb 2023 – Sep 2023 (8 mos)

- Engineered a hospital management system with React and Redux on the frontend and Express, Sequelize and MySQL on the backend, including role-based access control and appointment scheduling.
- Developed an interactive cricket application in Next.js with live data from third-party APIs.

PROJECTS

Avian BD, Sole Full-Stack Engineer

avianbd.com | 2026

- Designed, built and deployed a production e-commerce platform with 18 features in one Next.js App Router app: storefront, cash-on-delivery checkout, customer accounts and admin panel.
- Structured the backend into 8 domain modules behind a versioned REST API using Drizzle ORM, MySQL and Zod; calculated delivery fees for all 64 districts of Bangladesh.
- Secured the app with Better Auth (Google sign-in, email verification), rate limiting and origin checks; tested with Vitest and Playwright.

Home Crafter, Multi-Vendor Services Marketplace

[Live](#) | [Frontend](#) | [Backend](#) | 2024

- Built a marketplace with 3 user roles (admin, provider, customer) for service listings, booking, reviews and SSLCommerz payments using Next.js, TypeScript, Redux, Express and Prisma.

EDUCATION

B.Sc. in Computer Science and Engineering, Port City International University

Jan 2018 – Apr 2022
